

Clutch size and hatchling morphology of Parrot snake *Leptophis liocercus* in the north-east Atlantic Forest of Brazil

VANESSA DO NASCIMENTO BARBOSA, ADRIANO SOARES DA SILVA, ALERANDRO SOARES DA SILVA, ÉLIDA FRANCISCO DA SILVA, JOHN LÍNNIK, MATEUS LIMA DUTRA & FREDERICO GUSTAVO RODRIGUES FRANÇA

Table 1S. Dimensions (mm) and mass (g) of hatchlings of *Leptophis liocercus*. Measures of hatchlings were taken on the day of hatching (1–2 December 2022). ID = identification of the hatchling; SVL = snout-vent length; TL = tail length; BW = body width; BH = body height; HL = head length; HH = head height; HW = head width; NW = inter-nasal distance; ED = Eye diameter; DN = Distance between the navel and the cloaca; MA = mass.

ID	Sex	SVL	TL	BW	BH	HL	HH	HW	NW	ED	DN	MA
