

THE HERPETOLOGICAL JOURNAL

Volume 7, Number 3 1997

CONTENTS

Full Papers

- | | | |
|--|------------------------|-----|
| Developmental arrest in <i>Leptodactylus fuscus</i> tadpoles (Anura: Leptodactylidae) III: effect of length of arrest period on growth potential | J. R. DOWNIE & A. WEIR | 85 |
| Phylogenetic relationships among Australian elapid snakes: the soft anatomical data reconsidered | M. S. Y. LEE | 93 |
| Stage-frequency and habitat selection of a cohort of <i>Pseudacris ocularis</i> tadpoles (Hylidae: Anura) in a Florida temporary pond | A. I. KEHR | 103 |

Short Notes

- | | | |
|---|--|-----|
| A consideration of the phylogenetic significance of acrodonty | M. AUGÉ | 111 |
| Salinity tolerance and preference in the frog <i>Rana rugulosa</i> Wiegmann | J. DAVENPORT & K. K. HUAT | 114 |
| Substrate shifts in a population of striped plateau lizards, <i>Sceloporus virgatus</i> | G. R. SMITH | 116 |
| The use of imitation sand lizards to assess the accuracy of visual surveying techniques | D. TAYLOR & L. WINDER | 119 |
| Selected body temperatures of four lacertid lizards from the Canary Islands | R. MÁRQUEZ, D. CEJUDO & V. PÉREZ-MELLADO | 122 |
